

**LCD display confirms
NEC 2020 compliance on
your calculator**

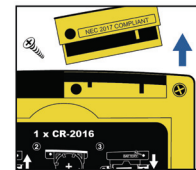

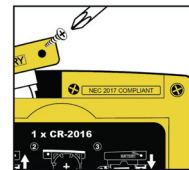

**New NEC code chip
installs easily and securely
in top of calculator**

**NEC 2020 Compliant
is labeled on chip to avoid
confusion during upgrade**

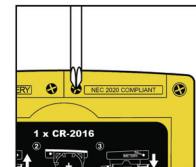

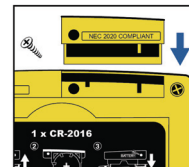

**Special anti-static
envelope keeps the chip
safe during shipping**

**1) WARNING: Remove battery before updating or
calculator may be damaged.**

2) With the back of the calculator facing you, unfasten the chip panel with a small Phillip's screwdriver.

3) Remove the old chip by sliding upwards.

4) Slide the 2020 update chip into place and replace the battery.

5) Re-fasten screws. Use a paperclip to press Reset – a small hole located below the **Off** key.
