

## FEATURES & BENEFITS

- ▶ The Adjustable Dual Prism is the newest addition to our 6603-Series for mining, tunneling, monitoring and rail
- ▶ Minimal horizontal angle is 84° (Hex tool included)
- ▶ Prism holder is machined from 303 stainless-steel
- ▶ Holders can be stacked for more than two prisms or a GNSS receiver can be connected on the top 5/8 x 11 stud so a GNSS measurement can also be made
- ▶ Compatible with standard surveying 5/8 x 11 accessories
- ▶ Zero prism offset, ±1 mm
- ▶ Includes two 62 mm silver coated, water resistant prisms, accuracy < 2 arc seconds
- ▶ Weighs 2.60 lb (1.18 kg)

## APPLICATIONS

- ▶ Ideal for mining, tunneling, deformation projects where taking measurements of the same point from two or more different directions is beneficial
