

6" Heavy Duty Professional Inch/Metric Stainless Steel Combination Square

Model #: 406EM-S
UPC: #049448063673
MSRP: \$14.70

Johnson's 406EM-S Combination Square features a self-aligning drawbolt, etched stainless steel blade with 1/8", 1/16", 1/32" and mm graduations, heavy duty 45° and 90° precision machined square head and a hardened removable scribe. A combination square is a tool used for multiple purposes in woodworking, stone masonry and metal working. A combination square can reliably measure 90° and 45° angles. The 45° angle is used commonly in creating miter joints. It can be used to determine flatness on a board known as the face side. It can be a rudimentary level for approximating level surfaces. A combination square can be used as a depth gauge or to transfer dimensions and the scribe can be used for marking the work surface.

PRODUCT DETAILS

- Auto-Lock™ blade assembly
- Stainless steel blade with permanently etched graduations 1/8", 1/16", 1/32", mm
- Heavy duty cast zinc head with black, chip-resistant e-coating finish
- CNC machined square head for greater accuracy
- Hardened, screw-in scribe won't fall out
- Durable acrylic vial
