#### EMC Declaration of Conformity

This receiver has been tested and found to comply with the limits for a Class B digital device for radio noise for digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communication, and is pursuant to part 15 of the Federal Communication Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This receiver generates radio frequency. If it's not used in accordance with the instructions, it may cause harmful interference to radio or television reception. Such interference can be determined by turning the receiver off and on. You are encouraged to try eliminating the interference by one or more of the following measures: Reorient or relocate the receiving antenna. · Increase the separation between the laser and the receiver. For more information, consult your dealer or an experience radio/television technician. CAUTION: Changes or modifications to the receiver that are not expressly approved by Spectra Precision LLC could void authority to use the equipment. Declaration of Conformity Application of Council Directive(s): 89/336/EEC Manufacturer's Name: Spectra Precision (USA) LLC Manufacturer's Address: 3333 WarrensvilleRd, Unit 200 Lisle, IL 60532 U.S.A. #### Warranty

Spectra Precision LLC warrants the CR700 to be free of defects in material and workmanship for a period of three years. Spectra Precision LLC or its authorized service center will repair or replace, at its option, any defective part, or the entire product, for which notice has been given during the warranty period. If required, travel and per diem expenses to and from the place where repairs are made will be charged to the customer at the prevailing rates. Customers should send the product to Spectra Precision LLC or the nearest authorized service center for warranty repairs or exchange, freight prepaid. Any evidence of negligent, abnormal use, accident, or any attempt to repair the product by other than factory-authorized personnel using Spectra Precision LLC certified or recommended parts, automatically voids the warranty. The foregoing states the entire liability of Spectra Precision LLC regarding the purchase and use of its equipment. Spectra Precision LLC will not be held responsible for any consequential loss or damage of any kind. This warranty is in lieu of all other warranties, except as set forth above, including any implied warranty merchantability of fitness for a particular purpose, are hereby disclaimed. This warranty is in lieu of all other warranties, expressed or implied.

## CR700 Quick Start

#### **Machine Mounted**

Set up the laser to the desired grade. The laser should be within 200m (660 ft) of the machine.

Adjust deadband to desired accuracy (5, 10 or 25mm).

Attach CR700 assembly to the dipper stick. Adjust height to be on grade (green lights).

While digging, bring dipper stick to plumb position and lower to dirt depth to determine height from desired grade.

### Vertical Mounted

Set up the laser in vertical mode.

Consider setting CR700 to Drift Alarm (see menu) to enable warning if the laser is disturbed.

Consider using Planlok to set laser direction. With Planlok, the laser will find the CR700. Must use a laser that can be paired with CR700.

CR700 can be placed directly on a floor in a building. Vertical adapter 105516 (sold separately) may be useful to attach to a batter board or tripod.

#### Contents

**CR700** 

User Guide

CR700 Receiver, C71 Magnet Clamp, C70 Grade Rod Clamp, 3 x AA Alkaline Batteries. User Guide

Attach Clamp

Attach the CR700 to the C71 magnet clamp for machine mounting

Rod Mounted

Attach the CR700 to the C70 grade rod clamp for rod mounting

or to desired grade.

Set up the laser to the desired grade.

Adjust the grade rod to "on grade" (green light).

While checking other locations, the LED arrows indicate high or low while the LCD provide digital distance from grade.

#### NOTE: Do not power up receiving a laser

CR700 is ready after "CAL" disappears from LCD

Backlight
Activate menu.
Scroll to LGHT. Enter.
Scroll to On or Off. Enter
Pair with Laser. This will enable laser
functions GradeMatch and PlanLok.
Activate menu.
Scroll to RDIO. Enter.
Scroll to RDIO LS. Enter
<ul> <li>Scroll to PAIR. Enter and also press appropriate</li> </ul>
buttons on laser (Manual and Power On)
Pair with another HL760 to be used as remote
Activate menu.
Scroll to RDIO. Enter.
Scroll to RDIO HL. Enter
Scroll to PAIR. Enter. And also perform same
function on the other HL.
Power receiver Off.
<ul> <li>The first receiver powered on is "laser receiver".</li> </ul>
The second displays "RMT.D okay" Press enter
to accept as remote display
Unit of Measure
Activate menu.
Scroll to UNIT
<ul> <li>Scroll to desired unit of measure. Enter</li> </ul>
Sensitivity. Increased sensitivity – longer
distance. Decreased sensitivity – better strobe
light rejection.
Activate menu.
Scroll SENS. Enter.
<ul> <li>Scroll to desired sensitivity. Enter</li> </ul>
Fractional inches reduction. Fraction
denomimator stays the same. May be useful to
check fine surface flatness. Example converts
4/8 in to ½ in.
Activate menu.
Scroll to FRC.R. Enter
Scroll to On or Off. Enter
Drift Alarm (when laser is in vertical orientation.
This results in no sound when aligned, but
beeper alarms when laser is disturbed)
Activate menu.
Scroll to DRFT. Enter.
Scroll to On or Off. Enter
Fingerprint. CR700 will react only with paired
laser, rejecting other laser strikes

• Activate menu. · Scroll to FRPT. Enter. · Scroll to On or Off. Enter Menu Function Flow
