

Product-Info

ETR Laser Rod

Easy To Read

Save time on every CUT & FILL operation on the construction site. The Nedo ETR Laser Rod is the perfect accessory for your rotating laser to increase the efficiency of your work.

Simply attach the laser receiver to the rod and position the detector in the plane of the rotating laser by means of telescopic sections. A measuring range of almost 17' facilitates even complex excavating jobs.

Your rotating laser and the Nedo ETR Laser Rod are a perfect match to cut your costs and fill your needs.

Nedo ETR Laser Rod is perfect for:

- Grading
- Excavating
- Building concrete floors

Features:

- Extra strong, anodized aluminum profiles
- Integral measuring tape
- Integral circular bubble for upright set up
- Display at eye level
- Extended length adjustable with thumb screws
- Easy to use
- Proven durable design
- Quality made in Switzerland
